Link Reposity :

https://github.com/Fiffah/git-repo/tree/main/modul3_1302204118

Hasil Run dan codingan :

```csharp
                        buah = State.Semangka;
                    }
                    else
                    {
                        state = State.Apel;
                        command = "QUIT";

                    }
                    break;
                }
                if (command != "QUIT")
                    Console.WriteLine("Kode Buah" + command + " : " + screenName[(int)buah]);
            }
            Console.WriteLine("Close");
        }
    }
